Skills Review

Name: Aaron Ludwig A. Altar **Grade:**

Course/Section: CPE4B **Date: Oct. 7, 2026**

Example No. 10: This program will create big and small rectangles with background and foreground colors. Save the program using sample10.asm as the filename

Setting Coordinates based on the screen layout

Program

```
; AARON LUDWIG A. ALTAR
; CPE4B

.model small
.stack
.code

start:

        ;< ---- Displaying of the big rectangle with BLUE background ---- >
        mov ah, 06h             ; Scroll up text lines
        mov bh, 10h             ; Background setting to color Blue
        mov ch, 0               ; starting row of Blue background (starting X
coordinate)
        mov cl, 0               ; starting column of Blue background (starting Y
coordinate)
        mov dh, 24              ; end row of Blue background (end X coordinate)
        mov dl, 79              ; end column of Blue background (end Y
coordinate)
```

```
        int 10h                 ; video function call to display the video
information

        ;< ---- Displaying of the small rectangle with YELLOW background ---- >
        mov ah, 06h             ; Scroll up text lines
        mov bh, 60h             ; Set rectangle color to Yellow
        mov ch, 5               ; starting row of the Yellow rectangle (starting
X coordinate)
        mov cl, 5               ; starting column of the Yellow rectangle
(starting Y coordinate)
        mov dh, 17              ; end row of the Yellow rectangle (end X
coordinate)
        mov dl, 74              ; end column of the Yellow rectangle (end Y
coordinate)
        int 10h                 ; video function call to display the video
information

        mov ah, 4Ch             ; terminate program
        int 21h

end start
```

Output
