Skills Review

Name: Aaron Ludwig A. Altar **Grade:**

Course/Section: CPE4B **Date: Oct. 7, 2026**

Example No. 12: The program will print the key pressed using Function 01h and it will stop after the 10th character input has been pressed. Save the program using sample12.asm as the filename.

Program

```
; AARON LUDWIG A. ALTAR
; CPE4B

.model small
.stack
.data

pol1    DB ' 10th CHARACTER HAS BEEN PRESSED..!!! $'

.code
start:
        mov ax, @data           ; initialize the data segment
        mov ds, ax

        mov cx, 10              ; counter - accept 10 characters only
        mov ah, 01h             ; Function 01h - read a key with echo
balik:  mov dl, al              ; copy the last key pressed to DL
        int 21h                 ; wait for a key then display it
        loop balik              ; CX = CX - 1, repeat until CX = 0

        mov ah, 09h             ; Function 09h - display string
        mov dx, offset pol1     ; message after the 10th key
        int 21h

        mov ah, 4Ch             ; terminate program
        int 21h

end start
```

Output

D:\>IF NOT ERRORLEVEL 1 D:\TEST
1234567890 10th CHARACTER HAS BEEN PRESSED..!!!
